GENERAL INDEX TO VOLUME LXXV

v 75 pt. 1

January—June, 1932

Jan. 5	Pages	1-46
Jan. 12	"	47-82
Jan. 19	"	83-118
Jan. 26	"	119-152
Feb. 2	"	153-188
Feb. 9	"	189-224
Feb. 16	"	225-260
Feb. 23	"	261-318
Mar. 1	"	319-354
Mar. 8	"	355-388
Mar. 15	"	389-422
Mar. 22	"	423-458
Mar. 29	"	459-496
April 5	"	497-534
April 12	"	535-570
April 19	"	571-606
April 26	"	607-642
May 3	"	643-678
May 10	"	679-714
May 17	"	715-750
May 24	"	751-784
May 31	"	785-834
June 7	"	835-870
June 14	"	871-904
June 21	"	905-940
June 28	"	941-974

A

ACCIDENTS AND ACCIDENT PREVENTION

Boiler operation precautions. T. J. Donnelly 68
Coal bunkers should have safety rules (Ed.) 498
Plant safety helped by cooperation between engineer and boiler inspector. J. P. Morrison 53
Pulverized coal buries two 492
Safety Council offers new prevention service 567
Safety record of El Paso Electric Co.. 639
Ventilation of diesel engine crankcase. E. J. Kates *443
Virginia Electric operating department safety record 420
Aerial-Tramway motor control. R. F. Emerson *336

AIR COMPRESSORS

Compressor discharge temperature 41
Moisture trap for compressed-air lines. E. L. Maag *666
Most economical number of compressors for air supply. H. M. Spring 765
Motors and control for fans, blowers and exhausters. E. C. Dieffenbach *758
Unloaders applied to synchronous-motor compressors. C. C. Nelson *234

AIR CONDITIONING

A.S.R.E. discuss at meeting in Cleveland. 217
Cleveland conference on air conditioning. 488
Cooling building with 60-deg. water Spivak, Hudson, Anderson, Bato.... 487
Developments in heating and ventilating. *31
Hotel New Yorker—design and operation pt. 2 electrical load. W. D. Lewis... 732
Mechanical or ice refrigeration for air conditioning? Leon Buehler Jr. *360
Optical laboratory temperature controlled within one thousandth degree. B. F. Randel *735
Radiators for building cooling. G. R. Hahn 914
Western Electric cable room maintains low humidity with silica gel Wells & Wade *429
Air, excess, calculations of 664

AIR PREHEATERS

Air heater corrosion. E. W. Robey.... 700
Air heater corrosion. B. M. Thornton.. 374
Air preheaters as seen by the operator. J. F. Muir 480
Overcoming corrosion and plugging in preheaters. G. L. Davis *774
Preheating air with steam. R. E. Fulreader 108
Trends in design of stokers report by Prime Movers 451
Waste steam for air preheating (Ed.).. 120
Air service uses light-weight diesels. O. F. Allen *236
Air system—removing moisture from air lines. Lauraline Mack *557
Akron's mooring mast contains 250 hp. lower plant *131
Alloy of chrome-nickel-iron. J. L. Everhart. 174
Aluminum foil—heat insulator for power plant equipment *717
American Engineering Council—Annual meeting 149
Unemployment among engineers cut down. 256
Washington meeting 782
American Institute of Electrical Engineers Protective devices at convention 214
Smoke problems discussed *414
Steam vs. electric drive for power station auxiliaries 195
American Society for Testing Materials. Friability of coal studied 489
Water analysis committee formed 749
American Society of Heating & Ventilating Engineers. Meeting in Cleveland; joint sessions with Amer. Soc. of Refrigerating Engineers 216
Amer. Society of Mechanical Engineers. Engineer's responsibility in smoke abatement 144
Fuels Division gives results of research on cyclone dust collectors *344
Oil engine power cost. M. J. Reed.... 210
Oil and Gas Power Division meets.... 932
Process meeting 902
American Society of Refrigerating Engineers Discuss vacuum refrigeration 931
Meeting in Cleveland, joint meeting with Amer. Soc. of Heating & Ventilating Engineers 216
New York Section elects officers..... 972
American Welding Society. Ductility, pipe welding and developments discussed.. 703
American Welding Society & American Society of Mechanical Engineers. Satisfaction with welding code reported .. 78

ASH HANDLING

Commercial uses of pulverized coal ash studied by Detroit and Cleveland companies 778
Recovery of pulverized coal, ash at Northern Indiana Public Service Co., Michigan City *425
Stud tubes coated with refractory trap ash from mid-western coal *500
Automotive power supplied by high speed Diesels. O. F. Allen *165

AWARDS

Lamme medal to G. Faccioli 352
Medalists of the year 39
Washington award to be presented to W. D. Coolidge 257

B

BEARINGS

How pump motor was kept in service. G. H. Emerson 136
Oil grooves in bearings 212
Reusing babbitt. A. H. Levy 452
Straightening large generator shaft and aligning bearings. A. S. Robertson.. *701
Two practical babbitting problems. Baker, Emerson, Stalnaker, Nagle.... 896

BELTS

Durability of conveyor belts 240
Leather belting sold by thickness instead of weight 494
Operation and care of multiple V-belts.. *766
Selecting multiple V-belts to suit the drive *573
Blowers, fans and exhausters, motors and control for E. C. Dieffenbach..... *758

BOILERS

Advisibility of blocking off stoker retort Butler, Butcher, G.E.L. 777
Air preheaters as seen by the operator. J. F. Muir 480
Automatic control adjusts air to mixed gases. K. A. Mayr *63
Belgian boiler has novel tube arrangement *632
Better furnaces for Mid-West coals (Ed.). 499
Boiler gage glass readings are misleading. E. H. Krieg *630
Burning cinders by Edison Electric Illuminating Co. 744
Calculations of excess air 664
Circulating pipe connection on Scotch-type boiler. I. A. Butcher *926
Compensating superheaters. P. W. Thompson *620
Connection for continuous blowdown.. 860
Conservation of heat in blowdown. E. F. Eckel 107
Cures offered for corrosion of natural-gas stack Hudson, Julsrud, Diers, Richardson, Butler 705
Cutting stand-by plant operating costs. R. F. Sorrells 665
Deaerating boiler feed water. A. E. Kittredge, 699; E. H. Krieg 445
Delray No. 3 plant has zoned air control for stokers. F. J. Chatel *121
Dual firing for peak loads. T. A. Ham.. 411
Effect of water level and rating on moisture carry-over 544
Electric steam generator supplies peak loads. M. G. Sanders *624
European units tend toward larger size.. *38

Flue-gas temperature from boiler rating. J. R. Darnell 331; G. R. Hahn 699; Otto de Lorenzi 597
Force feed lubricator employed as compound feeder. E. MacDermod *927
Furnaces for burning hog fuel. J. Gulick.*727
Fundamentals of boiler blowdown. W. J. Ryan *325
Germany's trend of power plant design.*251
Harding Street Station of Indianapolis Power & Light *227
Heat storage a help to boiler operation. M. K. Bryan *588
High pressure boiler for heating..... 668
High pressure residues as boiler oil. T. P. Stillman 381
Holland's specifications for boiler mountings. H. W. Los 170
How close damper regulation was made possible. J. R. Knox *893
Hudson Avenue Sta.—boiler design.... *803
Hudson Avenue Sta.—cinder catchers.. *812
Hudson Avenue Sta.—induced draft fans.*810
Hud. Ave. Sta.—operating procedure. Bert Houghton *793
Hud. Ave. Sta.—partial boiler plant cross-section 790
Internal-combustion boiler (Ed.) 752
Instruments and controls for boiler room. 30
Leveling boiler drums. H. M. Spring.... *595
Loeffler boiler's steam circulating pump. Bruno Belohlavek *504
Moscow boilers to operate at 1900 lb.. *335
New boiler welding rules 530
One CO_2 machine for two boilers..... 522
Operating at high rating with minimum refractory repair. H. S. Price..... 107
Oxford Paper Co's new boiler plant operates at 85 per cent efficiency. G. H. Dyer *85
Pitting of water boiler 448
Precautions in boiler operation. T. J. Donnelly 68
Pulverizer sizes and installation details from the operator's viewpoint. C. F. Hawley *96
Recommend hand firing Julsrud, Shure, Basore, Dobyns, Butcher 929
Sales for 1931 ..... 221, 711
Saving possible with dual pump drive. T. F. Folts 211
Simplest is generally the best (Ed.).... 154
Slag formation 967
Slag formation. J. L. Corcoran..... 651
Specifying steam generating units. H. G. Lykken 368
Steam boiler designed so that it can be packed for horse transportation..... *662
Steam purifier on flash tank. D. L. Darnell 597
Stoker trends reported by Prime Movers. 450
Stud boilers solve furnace problems with slagging coal in Chicago district..... *500
Surface tension and priming. L. W. Ross 137
Swift & Co. revamp steam supply at Chicago *155
Test boiler arranged for 400 lb. or 150 lb. (Mason Regulator Co., Boston).. *359
Texas has new boiler and license law.. 149
Trends in boiler practice in 1931..... *14
Velox boiler developed by Brown Boveri is pressure-furnace boiler..... *562
Water circulation in water-tube boilers. C. Boehm *737
Water tube boiler used as desuperheater. *617
Water-walled A-type marine boiler..... *62
Welded straight tube miniature boiler in research department of Amer. Chain. Dartrey Lewis *238
Bolts, gripping foundation, for heavy machines. J. E. Noble *211

BOOK REVIEWS

Abolition of poverty. H. E. Fryberger.. 74
American Electrician's Handbook. Terrell Croft 863
American Machinists Handbook. Colvin & Stanley 863
American Society of heating and ventilating engineers guide 1932 347
Annual report of the Board of Regents of the Smithsonian Institution 1930.. 347
Argeitstromung einer propeller turbine. Fritz Busmann 74
Behomoth: the story of power. Hodgins & Magoun 671
Business looks at the unforeseen. W. B. Donham 862
Competitive position of coal in the U. S.. 528
Dieselmaschinen V 670
Economic attitudes in industry. Caldwell, Norman & Younger 670
General engineering handbook ed by C. E. R'rourke 670
Handbook of chemistry and physics. Hodgivan & Lange 347
Handbook of industrial electricity. Max Kushlan 181
Guide des ingenieurs taschenbuch 181
Internal combustion engine. D. P. Pre.. 181

(*) Illustrated. (Ed.) Editorial.

Page

Municipally owned electric utilities in Nebraska. Raver & Sumner 529
National electrical code handbook. A. L. Abbott 671
Papers of the Institute of Hydraulic Machinery, Technical High School ed by W. Spannhake 862
Parados of plenty. Harper Leech 670
Pathways back to prosperity. C. W. Baker 528
Power plant management. W. N. Polakov 347
Quest for power. H. P. & M. W. Vowles. 74
Refractories. F. H. Norton 181
Rewinding data for direct-current armatures. Van Brunt & Roe 529
Rewinding and connecting alternating current motors. Braymer & Roe.... 862
Smoke: study of aerial disperse system. Whytlaw-Gray & Patterson 862
Swope plant 181
Symposium on the effect of temperature on the properties of metals..... 528
Wages and the road ahead. J. D. Mooney. 74
World depression to world prosperity. A. G. McGregor 181
Business conditions—Let's go (Ed.) 942
Our national headache (Ed.) 942
Business conditions 1931-1932 (Ed.).. 2

C

Cables—Highest voltage submarine cable across Columbia River *869
Highest voltage submarine cable for Ariel power 317
Calorimeter, throttling, to check steam. Lawrence Washington *472
Chimneys—Charging rent for stack space (Ed.) 836
Corroded steel stack 70

COAL

A.S.A. plans clean coal specifications.. 972
Better furnaces for Mid-West coals (Ed.). 499
Brazilian coal carbonized at low temperature 105
Burning coke breeze 522
Canada's use of low-rank fuels 452
Classification of coal. A. Bement..... 173
Features of car dumping at Waukegan station of Public Service Co. of Northern Illinois *440
Friability of coal to be studied by A.S.T.M. 489
Fuel, competition, plant reconditioning and stokers discussed at Midwest Coal Conference 674
King Coal needs a nurse (Ed.) 644
Low temperature carbonization (Ed) .. 48
Minnesota classifies coals according to smoke produced 639
1931 coal output 352
Shifting tonnages affect coal market (Ed) 84
Slag formation 967
Slag formation. J. L. Cocoran 651
Steam pressure effects coal consumption. 740
Stud tubes solve furnace problems with slagging coal in Chicago district *500
Tax on coal (Ed.) 608
Water soaked coal increases price. J. D. Arnester 373
Weighing coal by power consumption.... 70
Will the cheaper coal pay? Cater, Lapworth, Hahn, Longstreet, Avant, Forbes, Julsrud, Anderson 448
Coke see Coal:

COMBUSTION

Automatic control adjusts air to mixed gases. K. A. Mayr *63
Hudson Avenue station—automatic combustion control *809
Oxygen for starting 598
Stoker trends reported by Prime Mover.. 450
Compressors, gas—Adding 100 hp. to gas-engine-driven compressor. M. C. Cockshutt *849

CONDENSERS

Ammonia condenser design. W. R. Kitzmiller *592
Baffle prevents bypassing condenser air cooler. Ernst Holt *555
Control of cooling steam to synchronous condenser unit. H. M. Spring *246
Corliss engine with condenser 962
Economics of surface condenser selection. J. H. Smith *691
Hotwell alarm system. H. M. Spring.. *958
How steam consumption of air evactor was reduced. G. R. Hahn *665
Hudson Avenue Station—world's largest condensers *823
One-piece construction improves condensers. C. M. Taylor *442
Protecting vapor flow indicator on dry vacuum pump. H. M. Smith..... 409
Research shows effect of tube arrangement. Albert Delas 894
65,000 sq.ft. condenser for Kearny..... *567
Synchronous condensers automatically controlled. F. P. Brightman *542
Synchronous condenser reduces power costs. D. B. Apted 446
Value of clean condenser surfaces. M. F. Knoy 135

Page

CONTROL

Aerial-tramway motor control. F. R. Emerson *336
Automatic control adjusts air to mixed gases. K. A. Mayr *63
Automatic operation of synchronous motor. S. P. Bordeau *658
Automatic safety devices protect internal-combustion engines. W. M. Kauffman. *763
Boiler room instruments and controls... 30
Capacity of control circuit prevented contactor opening. A. C. McHugh 444
Car dumping at Waukegan station of Public Service Co. of Northern Illinois. *440
Changes in control wiring may lead to serious trouble. Marin Phillips 736
Cooling steam supply controlled in turbine system. H. M. Spring *246
Crane control improved by magnetic switches. O. Ariagno *465
Delray No. 3 plant has zoned air control for stokers. F. J. Chatel *121
Double deck elevators in Cities Service Building *720
Hudson Ave. Sta.—automatic combustion control *809
Mercury switches used on high and low water alarm. C. A. Miller *857
Motors and control for fans, blowers and exhausters. E. C. Dieffenbach.. *758
Room temperature controlled within one-thousandth degree. B. F. Randel ... *735
Routine inspection schedule for electric motors and control. Marin Phillips .. *892
Synchronous condensers automatically controlled. F. P. Brightman *542
Thyratrons and selsyns control high pressure steam generator. Potter, Solberg & Hawkins *584
Unloaders applied to synchronous-motor compressors. C. C. Nelson *234
Cooling towers—Two forced draft towers cool circulating water at Hawthorne plant. W. R. Loveless *907

CORROSION

Air heater corrosion. E. W. Robey... 700
Air heater corrosion. B. M. Thronton.. 374
Condenser coils. W. E. Warner 519
Corroded steel stack 70
Corrosion prevention methods in brine tanks and ice making tanks. R. S. Wheaton 857
Corrosion tester presented at National District Heating Assn. *967
Costs billion yearly 471
Cures offered for corrosion of natural-gas stack. Hudson, Julsurd, Diers, Richardson, Butler 705
Iron-pipe corrosion 109
Machine tests corrosive action *661
Overcoming corrosion and plugging in preheaters. G. L. Dabis *774
Paints to protect against corrosion 898
Rustproofing idle engine 776

COSTS AND PERFORMANCE

Automatic load regulation reduces power costs. R. A. Geiselman *469
Boiler fuel oil burnt in a diesel plant. J. J. McDougall *688
Broadcasting with oil engine power. P. J. Stieger *159
Calculating steam and power costs in industrial plants. H. J. Byrne *140
Changes in operation that reduced costs. I. A. Butcher 556
Chicago Post Office might have saved by operation of own power plant. C. M. Garland *125
Combination coal, oil and gas burners permit profit 91
Cutting stand-by plant operating costs. R. F. Sorrells 665
Depreciation rates on power equipment (Ed.) 680
Diesel power replaces steam at Commander mill *578
Economics of building heating with refrigeration equipment. B. H. Jennings (Southern California Edison Co.)...*946
Economics of surface condenser selection. J. H. Smith *691
Engineering studies essential in economic hydro-plant operation 249
Gimbel Brothers Department Store saves $30,000 yearly by modernization. A. L. Cole *943
Hotel New Yorker—design and operation pt. 1 low-pressure steam. W. D. Lewis.*645
Hotel New Yorker—design and operation pt. 2 electrical load. W. D. Lewis 732
Integrity Building heating system operating costs. S. M. Green *163
Long Is. College Hospital cuts fuel costs by improved equipment and operation. *396
Office building power and heat supply. L. E. Habben 550
Oil engine power cost collected by A.S.M.E. M. J. Reed 210
Oxford Paper Co's new boiler plant operates at 85 per cent efficiency. G. H. Dyer *85
Power costs cut $9,200 by investing $15,000. J. G. Berger 582
Power costs reduced by synchronous condenser. D. B. Apted 446
Power-factor correction an economical problem. O. H. Henschel 369
Put plant fuel costs where they belong. C. C. Anderson *753
Royal Victoria hospital costs reduced $34,000 annually. D. F. Graham ..*681

(*) Illustrated. (Ed.) Editorial.

Page

Showdown on hotel estimates (Ed.) ... 644
Swift & Co. revamp steam supply at Chicago *155
Synchronous condensers automatically controlled. F. P. Brightman *542
Cranes, gantry, for hydro-electric plants..*648
Cyclone dust collectors—research results given at A.S.M.E. meeting *344

D

Dams see Water Power:
Decibels for power engineers (Ed.)..... 536
Specifications of power noises. E. J. Abbott *537
Decimals, extreme use of. D. J. Alison... 581
Derricks, steam operation changes to motor. R. F. Emerson 95
Diphenyl oxide for air preheating..... *4
Drive—Constant versus variable speed for auxiliary drives. E. H. Throckmorton. *466
Steam vs. electric for power station auxiliaries 195
Dust elimination see Smoke abatement:

E

ELECTRICITY

Add voltage studies to power surveys (Ed.) 390
Alternating current motors for elevator operation. C. P. Hamilton *915
Aluminum conductors for high capacity electric circuits. F. R. Dallye *685
Armature coils dryed out with a transformer. L. W. Wyss *484
Automatic load regulation reduces power costs. R. A. Geiselman *469
Blowing-time tests made on renewable fuses 583
Capacity of control circuit prevented contactor opening. A. C. McHugh..... 444
Car dumping at Waukegan station of Public Service Co. of Northern Illinois. *440
Coils may be cut out of induction motor windings. Roe, MacCorkle, Wagner, Cummings, Powell, Killough 522
Commutator on large armature trued in temporary bearings. B. W. Hamilton.. *98
Comparative costs of capacitors and synchronous condensers. T. E. Ormiston. 858
Compensated exciters designed for quick response. I. C. Smith *878
Conners Creek storm-water pumping station driven by synchronous motors. Ayres & Lewis *609
Control wiring changes may lead to serious trouble. Marin Phillips 736
Correct flywheel for synchronous-motor-driven compressors. R. C. Allen *128
Crane control improved by magnetic switches. O. Ariagno *465
De-ion air-breaker circuit breakers demonstrated 419
Direct-current excitation of wound-rotor motors. W. W. Lakton *687
Economical power factor improvement. K. B. Hoffman 485
Electron tube applications to power generation and control *514
Electron tubes: new tools for power engineers *430
Electrostatic precipitator for recovery of pulverized coal ash at Northern Indiana Public Service Co., Michigan City....*425
Emergency operation of sluice gates. R. F. Emerson *65
Equalizer connection causes load swings. H. M. Spring 445
Fuses and thermal cutouts protect three phase motors. G. E. Pickett 858
High temperature causes fuses to blow. H. M. Spring 137
Hotel New Yorker—design and operation pt. 2 electrical load. W. D. Lewis.... 732
Hudson Avenue station—generator rotor handling *820
Improper grounding of electrical equipment. L. L. Pollard 698
Insulating oil property cared for reduces maintenance costs. Marin Phillips ...*398
Insulation details that prevent winding failures. A. C. Roe *439
Load-duration curve. A. G. Christie.... 243
Load limited automatically on direct current generators. R. R. Longwell..*629
Load tests on motors. Emerson, Wisinski 176
Load tests on motors. V. N. Friedman.. 248
Magnetic separators installed on car ferries 45
Maximum demand adjusted to suit load requirements. Ellis Mills *483
Mercury-arc rectifiers efficiency improved by sectionalizing *342
Mercury arc rectifier made in two sections *545
Mercury switches used on high and low water alarm. C. A. Miller *857
Motor treatment for operation in wet places. Marin Phillips *90
Motors and control for fans, blowers and exhausters. E. C. Dieffenbach *758
Office buildings power and heat supply. L. E. Habben 550
Phantom-coil signal circuits on telephone lines. Hammond Mathews *773
Photo-electric recorder. C. W. La Pierre.*742

Page

Pointers on electric-machine windings. A. C. Roe *171
Polarity of interpoles 138
Power equipment trends in 1931..... *28
Power factor improvement must not neglect economy. E. F. Carlsen 411
Power factor of single phase load on a three phase circuit. M. S. Macgillivray. *175
Preventing single phase operation on three phase circuits. Hepner, Molinet 738
Protective devices discussed at A.I.E.E. convention 214
Providing protection for three phase motors. R. B. Glen 884
Rectifiers compared with rotary converters. C. M. Ward *524
Regulator fails to function because of wrong connections. C. W. Hope 558
Service interruption caused by failure to phase-out generators. C. W. Hope.... *511
Shunt load balances battery discharge. S. B. Stoughton *106
Single phase rotary converter 776
Size of conductors required for lighting load 412
Sodium lamp *639
Sphere gaps *589
Steam vs. electric drive for power station auxiliaries 195
Synchronous condensers automatically controlled. F. P. Brightman *542
Taxing electricity (Ed.) 390
Thermal cutouts applied to motor protection. H. D. Braley *66
Thermionic tubes in industry..... 124
Three phase motors start on single phase line. F. F. MacWilliams..... 859
Thyratrons and selsyns control high pressure steam generator. Potter, Solberg & Hawkins *584
Torques required by synchronous motors. M. N. Halberg *854
Transformer casing for Hell Gate Station *73
Transformer insulation *482
Transformer radiators welded and blown up by air pressure *104
Transformer stands lightning test..... 493
Transformers in parallel with open-delta and closed delta banks. H. D. Forsyth. *107
Uses thermal overload relays to protect three phase motors. E. E. Norman.. 858
Voltage fluctuations appear to be caused by steam engines 560
Watt-hour meter runs backwards..... 860
Watt-hour meter and lamps as phase-rotation indicator. L. W. Wyss *479
Wire covering weather-resistant..... 526
Electron tubes see Electricity:

ELEVATORS

Alternating current motors for elevator operation. C. P. Hamilton *915
Carlsbad Caverns elevator with diesel units 384
Double-deck elevators in Cities Service Building *720
Modernizing elevator service (Ed.) .. 320
New code favors elevator progress..... *32
Radio City office building to have 76 elevators 222
Runs at overspeed 962
Selecting elevators for an office building. H. B. Cook 404
Employees—Electrical manufacturers adopt Swope employment program 783
Employees. See also Labor.

ENGINEEERING EDUCATION

A.S.M.E. Freeman travel scholarship in hydraulics 712
College course inadequate for engineers 744
Economic hydro-plant operation requires engineering studies 249
English-economics-engineering (Ed.).... 460
License law in New York State..... 633
Practical man vs. the theorist. C. J. Mason 68
What the practical man wants of the theorist (Ed.) 836
Engineering and science (Ed.) 356

ENGINEERS

Bill to contract for services in planning public buildings (Ed.) 320
Buying is an operating responsibility (Ed.) 226
Cooperation between engineer and boiler inspector insures plant safety. J. P. Morrison 53
Court backs license law (Ed.) 460
Engineers and the machine world. Orville Adams 667
Engineers and this machine world (Ed.). 190
Evaluation of manufacturer's proposal (Ed.) 320
Operating—a job or vocation (Ed.) 906
Operators must face new conditions (Ed.) 84
Society activities in 1931 39
Unemployment bureau in Boston 221
Unemployment fund 185
Engines—Malone water expansion engine. Max Wulfinghof *320

ENGINES—INTERNAL COMBUSTION

Air service uses light weight diesels. O. F. Allen *236
Akron's mooring mast contains 250-hp. power plant *131
Automatic safety devices protect internal-combustion engines. W. M. Kauffman. *763
Better diesel exhaust lines (Ed.) 226
Boiler fuel oil for diesel engines (Ed.).. 680

Page

Broken piston rod causes knock. W. W. Dingwall 557
Burning boiler oil in diesels, 178, J. W. Keck 248
Burning cheaper oil in diesel engines. Alfred Buchi 447
Buying fuel oil for diesel engines on dollar-saving basis. Gerald Grow.... *724
Cleaning diesel oil pump nozzle. T. C. Hulton *337
Connection to indicator reducing motion. H. V. Beck *926
Correct exhaust piping improves engine performance. H. F. Shepherd *401
Crank pin pressures in gas engines. G. Grow *889
"Deutschland" to have 56,800-hp. diesel plant 346
Diesel cooling water systems. E. F. Eckel 68
Diesel cylinder liner materials. M. E. Greenhow *546
Diesel cooling water systems. H. A. Gustin 411
Diesel engine—crankcase ventilation. E. J. Kates *443
Diesel engine of aluminum, diamond-shaped, eight cylinders, sixteen pistons *79
Diesel engines as portable power plants. O. F. Allen *99
Diesel engines can be operated with one piston disconnected. H. W. Stalnaker. 926
Diesel engine cost decline 138
Diesel engine cylinder liner repairing. T. C. Hulton *175
Diesel engine's future position. O. F. Allen *474
Diesel power replaces steam at Commander mill. P. J. Stieger *578
Diesel spray nozzles coefficients 174
Diesel units for house service (Ed.).... 498
Diesel units for house service. M. Y. Curley 667

Circuit breaker, outdoor oil *968
Clutch, magnetic friction-type *746
Clutch, multiple-disk magnetic *349
Coal weigher *600
Contactor, A.C. reversing *934
Contactor, magnetic *746
Controller, steam operated *900
Conversion burner and safety pilot switch *969
Conveyor, steel apron *968
Conveyor scale equipped with photo electric unit *707
Corrugated steel pipe expansion bends. *254
Couplings, flexible *111, *934
Couplings, leather lined..... *565
Damper controller *383
Diesel, four stroke solid injection..... *255
Dispatching machine for elevator..... *601
Drive, Standard stoker *75
Electrode for welding aluminum..... 673
Electrodes, coated 864
Electrographitic brush 867
Elevator, hydraulic, with push button control *348
Equalizing non-reflux elbow *937
Feed water regulator *113
Filter, air *865
Filter, streamline, for lubricating and insulating oil *147
Fire brick 867
Fittings for pipe welding *148
Floodlight, weatherproof portable..... *934
Frequency-changer set *76
Furnace wall, stud-tube *708
Fuse, renewable *746
Gage, absolute pressure *673
Gage, pocket draft *183
Gage, recording pressure *75
Gaskets, metal and asbestos *709
Gate, bunker apron *148
Gear, reversing *565
Gear drive, motorized, for stokers..... *971
Gearmotors *218
Governors for internal-combustion engines *672
Graphic instruments *968
Ground tester *219
Hammer, electric *780
Heaters, built-in for vapor and vacuum heating *865
Hoist, electric portable *77
Hose, seamless metallic *707
Hydrometer, boiler water concentration.. *672
Illuminometer *112
Joint, corrugated-type expansion..... *146
Joint, expansion, for flues..... *935
Lightning arrester inside of transformer. *527
Liquid-level controller *77
Liquid level indicator *935
Locknuts, self locking *867
Lubricator, force-feed *707, *934
Lubricator, guide rail *745
Lubricator, guide rail, uses stick greaser. *636
Lubricator, pressure-reservoir..... *218
Manometer, high-range *255
Meter, ring-balance flow *637
Meter, small-capacity condensation..... *76
Meter, water *901
Meters for liquids and gases *709
Meters, weir and orifice *935
Mica undercutter *780
Motor, direct current *781
Motor, polyphase capacitor *745
Motorpump 113
Motors with self-contained speed reducer or speed increaser *183
Oil purifier, centrifugal *349
Oil purifying unit *970
Oil reclaimer, unipass *145
Oil seal for anti-friction bearings..... *746
Oiling system, automatic *935
Oiling system on small motors *77
Operator for elevator doors, high-speed electric *182
Orifice, adjustable, for fluid meter installations *453
Packing, acid-proof 565
Panel for stoker zone control *146
Pipe-fitting machine for welded connections *145
Pipe joint, Van Stone *637
Pipe machine, portable *900
Potentiometer, self balancing indicating.. *971
Power and light unit, portable *75
Pressure control instrument *417
Primer, suction line *219
Pulley, vacuum cup *491
Pulverizer, table-roller *112
Pulverizing and direct firing unit.... *970
Pumps, centrifugal *708; *865 ..... *780
Pump, propeller type *864
Push button stations *708
Recorder, boiler-water level *254
Recorder, combustion indicator *747
Reduction gear in five types..... *745
Regulator for feed water *672
Regulator, feed-water *182..... *900
Regulator, oxygen and acetylene..... *349
Regulator, steam *970
Regulator, temperature *864
Relay, electronic micro *969
Review number Feb. 23.
Safety device, automatic, for burners.. *971
Screens, vibrating *866
Seismograph, miniature, measures vibration *527
Signal device for feed water regulator control valve *709
Smoke comparator *113
Smoke indicator *867
Solder for wide range of metals..... 636
Speed reducer, planetary-type *183
Speed reducer, worm gear *147
Starter, cubicle, for synchronous motors. *970
